Fixed Income Update for December 2012

Key Market Highlights:

- RBI continued announcing OMOs in December too as liquidity conditions continued to remain above tight. Totally OMOs worth ₹ 40,000 crore was announced and almost fully accepted. Gilt yields ended lower compared to previous month on OMOs and lower than expected inflation. The benchmark ten year Gilt yield ended the month at 8.05% as compared to 8.17% the previous month.
- Corporate bond yields showed mixed performance. While at the short end yields rose due to liquidity conditions at the long end yields fell marginally. The ten year AAA PSU Corporate bond benchmark closed at 8.93%, 2 bps lower than previous month. Corporate bond spreads remained stable.
- November WPI data release came at 7.24% y-o-y vs 7.45% y-o-y in October. CPI came higher for November 2012 at 9.90% compared to 9.75% in previous month.
- October industrial production (IIP) came sharply higher at 8.2% reflecting festive season demand and inventory release.
- Banks credit growth was at 16.27% in December 2012 while deposit growth was marginally lower at 13.35%.
- CD rates rose reflecting tight liquidity and higher issuance on rollovers. 3 month CD rates closed at 8.50%, 15 bps higher than previous month. 1 year CD rates rose to 8.78 compared to 8.73 in previous month.

- Liquidity deficit worsened during the month on account of festive season currency leakage and lower government spending. Average LAF repo borrowing for the month was at ₹ 119,000 crore.
- On last day of the month, government announced postponement of the first auction for January 2013 to February 2013 citing adequate cash balances.

Outlook:

- With government postponing auction and further OMOs, the supply of G-Secs during the month is negligible. This and continued rate cut expectations would give support to gilt yields. The ten year G-sec benchmark is expected to trade in a range of 7.80-8.10.
- Liquidity in the banking system is expected continue to remain in deficit mode in the range of 60,000 crore to 80,000 crore as reflected in RBI LAF repo borrowing numbers. We expect some of the advance tax outflows to come back to the system vis government spending.
- Yields of short term CDs and CPs are expected to fall as debt mutual funds receive fresh inflows and liquidity improves. Chances of rate cut by RBI would also give support to CD yields.
- Corporate bond spreads may remain at similar levels as last month or widen on account of primary issuance. We expect the ten year benchmark AAA PSU Corporate bond to trade in a range of 8.70% to 9.00%.
- We expect RBI to cut key rates by 25 bps in its Policy review due on 29th Jan 2013.

Equity Markets

Review of Equity Market for the Month of December 2012

The equity markets remained flattish during the month - the BSE Sensex and S&P CNX Nifty was up by a mere 0.4%.

Global equity also remained largely subdued due to the overhang of the pending negotiations on the fiscal cliff in US.

Portfolio inflows remained strong during the month with FIIs being net buyers of over ₹ 24,000 crore while domestic institutions remained net sellers of ₹ 2700 crore.

The winter session of the parliament did see its share of disruptions but it also witnessed the passage of the Bank Amendment Bill which gives more power to RBI and in turn facilitates the issuance of new bank licenses. The Cabinet Committee on Economic Affairs (CCEA) cleared urea investment policy which aims to attract investment of ₹ 350bn to increase domestic production by 8mn ton. It also cleared the proposal to set up the Cabinet Committee on Investments (CCI) with a view to speeding up clearances to large investment projects and amendments to the Land Acquisition Bill.

The Centre's fiscal deficit in the April-November period of 2012-13 was ₹ 4.1 trillion – 80.4% of the Budget Estimates (BE). The current account deficit (CAD) for the second quarter ended September 2012 rose sharply to \$22.3 billion from \$18.9 billion in Q2 of a year ago due to higher pace of imports and moderating exports growth. On a positive note, the manufacturing sector grew at its fastest pace in six months in December, boosted by strong factory output and spike in new orders. India's exports fell by 4.2%

to \$22.3 billion in November, while imports rose by 6.3% to \$41.6 billion, leaving a trade deficit of \$19.3 billion. The IIP for October also surprised positively at 8.2%. WPI inflation for November eased marginally to 7.24% vs. 7.45% in October, largely on account of lower fuel prices.

The RBI in its latest credit policy held policy rates, along expected lines but sounded positive on interest rate cuts going ahead. The market expectations are a cut in rates by 50-100 bps in CY2013 given the trajectory of inflation is likely to be on a moderating trend.

Looking back at CY2012, the Indian markets did much better than most expectations. The rally was on the back of Government initiatives to reign in the fiscal deficit, policy initiatives to spur growth, strong inflows from FIIs given the relatively better positioning of India in the global context and recent data that seemed to suggest that growth is bottoming out. We believe the markets are reasonably valued at the current juncture at 14x FY2013 earnings, and offer an upside of 10-15% from the current levels in CY2013. However, in view of the sharp rally recently and the uncertainty associated with the Budget which could take tougher steps to address the fiscal deficit, we see the market remaining range bound in the near term and more bottom-up.

In most of our Funds, as of December end, we are overweight (relative to respective benchmarks) on Pharmaceuticals, Services and Media and are underweight on Metals, Energy and Consumer.

Principal SMART Equity Fund (An open-ended equity scheme)

FUND FEATURES

QAAUM (For the period October to December 2012):

₹ 110.43 crore

NAV per unit (As on Dec. 31, 2012)

Growth Plan : ₹ 11.46

Dividend Plan : ₹ 11.46

INVESTMENT OBJECTIVE

The primary objective of the scheme is to seek to generate long term capital appreciation with relatively lower volatility through systematic allocation of funds into equity; and in debt /money market instruments for defensive purposes. The Scheme will decide on allocation of funds into equity assets based on equity market Price Earning Ratio (PE Ratio) levels. When the markets become expensive in terms of 'Price to Earnings' Ratio'; the Scheme will reduce its allocation to equities and move assets into debt and/or money market instruments and vice versa.

* Resident Individuals, HUF, BOI, AOP, Domestic companies, Non Resident Individuals ('NRIs') and Foreign Institutional Investor ('FIs'). It is assumed that the units are held as capital assets by the investors.

[^] Plus applicable surcharge, if any, and Education Cess at the rate of 2% on income-tax and surcharge and Secondary and Higher Education cess at the rate of 1% on income-tax and surcharge.

¹ Transfer of such units should be subject to Securities Transaction Tax.

^{**} Non-resident investors / FIs shall be entitled to be governed by provisions of the applicable Tax Treaty, which India has entered with the country of residence of the non-resident investor, if that is more beneficial than the provisions of the Income-tax Act, 1961 ('the Act'), subject to certain conditions. As per section 90(4) of the Act, a non-resident shall not be entitled to claim treaty benefits, unless the non-resident obtains a Tax Residency Certificate ('TRC') from their home country, containing such particulars as may be prescribed.

^{***} As per section 112 of the Act (as amended by the Finance Act, 2012), long term capital gains in case of non-residents would be taxable @ 10% on transfer of capital assets, being unlisted securities, computed without giving effect to first & second proviso to section 48 i.e. without taking benefit of foreign currency fluctuation and indexation benefit.

^{##} Section 196D of the Act provides that no tax is required to be withheld for payment to a FI in respect of capital gains arising on transfer of units.

[#] As per provisions of Section 206AA of the Act, if there is default on the part of a non-resident investor (entitled to receive redemption proceeds from the Mutual Fund on which tax is deductible under Chapter XVII of the Act) to provide its Permanent Account Number ('PAN'), the tax shall be deducted at higher of the following rates: i) rates specified in relevant provisions of the Act; or ii) rate or rates in force; or iii) rate of 20%.

INCOME TAX RATES FOR INDIVIDUAL / HUF / AOP / BOI for AY 2013-14	
Total Income	Tax Rates (c)
Up to ₹ 200,000 (a)(b)	NIL
₹ 200,001 to ₹ 500,000	10%
₹ 500,001 to ₹ 1,000,000	20%
₹ 1,000,001 and above	30%

(a) In the case of a resident individual of the age of 60 years or more but less than 80 years, the basic exemption limit is ₹ 250,000.
 (b) In the case of a resident individual of the age of 80 years or more, the basic exemption limit is ₹ 5,00,000.
 (c) Education cess is applicable at the rate of 2% on income-tax and secondary and higher education cess at the rate of 1% on income-tax.

WEALTH TAX ON MF UNITS	
Wealth Tax	MF units are exempt

This information is being provided for basic guidance for investments in mutual funds and is based on provisions of the Income-tax Act, 1961 as amended by the Finance Act, 2012. The tax implication may vary for each assessee based on the details of his income. All rates and figures appearing are for illustrative purposes only. Tax benefits are subject to change in tax laws. Contents of this note have been drawn for informative purpose only and the same should not be used or considered as an investment/tax advice. The AMC/Trustee/Sponsor accepts no liability whatsoever for any direct or consequential loss arising from any information provided in this snapshot.

SECURITIES TRANSACTION TAX	
Equity Oriented Fund	
Sale of a unit of an equity oriented mutual fund to the mutual fund	0.25%.
Purchase of a unit of an equity oriented mutual fund where transaction is entered into in recognized stock exchange and the contract for sale is settled by the actual delivery [§]	0.125%
Sale of a unit of an equity oriented mutual fund where transaction is entered into in recognized stock exchange and the contract for sale is settled by the actual delivery [§]	0.125%
Other than Equity Oriented Fund: Exempt from securities transaction tax	
Mutual Fund would also pay securities transaction tax wherever applicable on the securities bought/sold	
As per Section 94(7): The loss due to sale of Units in the schemes (where income distributed on MF units is tax free) will not be available for set-off to the extent of the tax free income distributed; if units are :- (A) Bought within three months prior to the record date fixed for income distribution; and (B) sold within nine months after the record date fixed for income distribution.	
As per Section 94(8): The loss due to sale of original Units in the schemes, where bonus Units are issued, will not be available for setoff; if original units are :- (A) Bought within three months prior to the record date fixed for allotment of bonus units; and (B) Sold within nine months after the record date fixed for allotment of bonus units. However, the amount of loss so ignored shall be deemed to be the cost of purchase or acquisition of such unsold bonus units held on the date of transfer of original units. [§] (The Finance Act, 2012, has reduced the rate to 0.1% with effect from 1 July 2012.)	

Understanding Ratios & Risk Measures

- **STANDARD DEVIATION** - Is the average deviation from the mean returns. It is an indication of volatility i.e. deviation from mean returns. Lower the better.
 - For instance a scheme that has a consistent four-year return of 3% would have a mean or average of 3%. The standard deviation for this scheme would then be zero because the scheme's return in any given year does not differ from its four-year mean of 3%.
 - On the other hand, a scheme that in each of the last four years returned -5%, 17%, 2% and 30% will have a mean return of 11%. The scheme will also exhibit a high standard deviation because each year the return of the scheme differs from the mean return. This scheme is therefore riskier because it fluctuates widely between negative and positive returns within a short period.

Calculation = Square Root of Variance. Where Variance is the average of the squared deviations from mean returns.
- **BETA** - Can be interpreted as percentage change in price of a scheme for every one percentage change in the market benchmark. For example if a scheme's beta is 1.1 and the market is expected to go up/down by 10% then the scheme will move up/down by 11%.

Calculation = Covariance of Market and Scheme's Returns Divided by Variance of the Market. Where Covariance is the Deviation of Mean Returns of Market multiplied by Deviation of Mean Returns of the scheme.
- **JENSEN'S ALPHA** - Gives the average return of the portfolio over and above the risk free rate and market determined return. This is the addition by the fund manager over and above the market return and hence higher the better.

Calculation = Portfolio Return - (Risk Free Rate of Return + beta [market return - Risk Free Rate of Return]).
- **SHARPE** - Gives the returns per unit of risk. i.e. for every 1 unit of risk what is the returns of the scheme. For this purpose risk is defined as standard deviation of the scheme. Higher the Sharpe, the better.

It signifies that scheme with a higher sharpe ratio generates returns taking lesser risk. In other words, the scheme is less volatile and yet generating good returns. Thus, given same returns, the scheme with a higher Sharpe ratio offers a better avenue for investing.

Calculation = Average Scheme Return - Risk Free Rate of Return ÷ Standard Deviation of the Scheme.
- **PORTFOLIO TURNOVER** - Portfolio turnover is a measure of how actively a fund manager trades the portfolio of your scheme. Expressed in percentage or number of times, the inverse of a scheme's turnover ratio is the average holding period for a security in that scheme. If a scheme has a 20 per cent turnover ratio, it would suggest that on average that scheme will hold a security for five years before selling it. A scheme with a 200 per cent turnover ratio will change its portfolio in six months or in other words, replace the entire holdings in its portfolio with new stocks in six months.

Calculation = Lower of sales or purchases divided by average AUM for last rolling 12 months.

DISCLAIMER:

Mutual Fund investments are subject to market risks, read all scheme related documents carefully.

This factsheet is for informative purpose only and under no circumstances is to be used or considered as an investment advice. Terms of issue / load structure / Scheme specific risk factors are set forth in the Scheme Information Document (SID). Copy of the same is available at all our Investor Service Centres.
